

Fluent Lighting

COLOR GUIDE

What makes the acrylic-encased fixtures from Fluent unique is their complex and dynamic appearance that molds and shifts color as the viewer moves past the fixture. Colors take on highlights and shadows. Light is both emitted and retained.

This guide helps visualize the typical color effects of the decorative back plate when placed behind the different acrylic profiles offered by Fluent. Each profile has its own personality.

Please contact Fluent with any questions or if you would like color samples or have special requests.

LET'S CONNECT

DISC & DONUT
